

# SURESH PRAJAPATI

## OBJECTIVE

I aim to leverage my expertise as an Sr Android developer and TL to drive innovation and growth within our organization. My objective is to lead cross-functional teams in delivering cutting-edge Android applications that exceed user expectations and industry standards. I aspire to deepen my knowledge of emerging technologies like AR/VR integration and AI-driven solutions, contributing to our company's competitive edge in the mobile app market.

## EXPERIENCE

- **Bacancy**

*Jul 2023 - Present*

Sr Android Developer (TL)

As a Senior Android developer and TL, I facilitated daily scrum meetings, managed three projects simultaneously, and mentored trainees to enhance their skills. Additionally, I actively pursued learning new technologies such as Jetpack Compose and implementing Clean MVVM architecture.

- **ManekTech**

*Mar 2022 - Jul 2023*

Sr Android Developer

I've been employed here for more than 14 months. throughout that time, I've learned new coding techniques, handled client communications, and worked remotely. Learn about Live Data, Data Binding, and MVVM

- **Excellent Web World**

*Dec 2020 - Mar 2022*

Android Developer

A key member of the team and worked on more than 8 Projects. Also start kotlin from this company as well as learn Web RTC, Data binding, MVVM structure, Socket.io for chat implementation. also handle client on chat.

📍 Hariom Apartment, Radio Mirchi Road, Satellite, Ahmedabad - 380015

## SKILLS

- Java & Kotlin
- Jetpack Compose
- Clean MVVM Architecture, MVP & MVC
- Data Binding & View Binding
- Jira, Mentis & Trello
- Bit Bucket & Github
- Room Database
- Firebase
- Socket.io & Hardware Connectivity
- Custom & Dynamic Views
- Social Media Integration
- Google Map integration
- Third Party Integration
- Daily Client Communications & Scrum

- **iMobTree solution**

*April 2019 - Nov 2020*

Jr Android Developer

I was started my development journey from this company, I have learned basic things in android from here like Intent, Fragments, Layouts, Firebase, SQLite database etc. I worked more than 4 projects in this company with java only.

## EDUCATION

- **KD Polytechnic Patan**

*2018*

Diploma In Computer Engineering

6.4

## PROJECTS

- **SNAQ POS**

This project is centered around a POS system designed specifically for a small business. The system is dedicated solely to managing billing operations and is hardware-based. We utilized external printers for generating receipts. The system handles food billing and all associated calculations such as discounts and taxes.

- **Fetii Taxi**

This project is a taxi service application similar to Uber or Ola, designed to connect customers and drivers. The primary goal of the application is to facilitate travel from one location to another based on user selection. For instance, a customer can request a ride from their current location (XYZ) to a destination (OPQ) using the app. Drivers receive ride requests and can accept them if available. Once a driver accepts a request, they pick up the customer at their location and drop them off at the destination. The application is built using Kotlin and follows the MVVM design pattern.

- **Kuick Live Streaming**

This is a commercial project enabling users to purchase products and services through live streaming. Sellers can initiate live streams via the admin panel for their products. The application includes a media library to facilitate seamless live streaming functionality. Given the real-time nature of the service, we employed a socket to manage upcoming live streaming sessions. The application is built using native Android with Java programming language.
